

**8****AQUA BLEND CONCENTRATED  
CARPET & UPHOLSTERY SHAMPOO****B20**

# TECHNICAL DATA SHEET

**GENERAL INFORMATION**

CARPET & UPHOLSTERY SHAMPOO is a formulation that has evolved over thirty years to provide a system that cleans deeply to emulsify greasy soils and residues left by other cleaners. CARPET & UPHOLSTERY SHAMPOO restores carpet to its original condition without leaving soil attracting residues in the body of the fibers.

CARPET & UPHOLSTERY SHAMPOO represents the most recent technology in the carpet maintenance field.

The ultimate cleansing system results when CARPET & UPHOLSTERY SHAMPOO is used in conjunction with CARPET PRE-SPRAY & SPOTTER and CARPET & UPHOLSTERY EXTRACTION CLEANER. This system will bring carpets back from the brink of having to be replaced.

CARPET & UPHOLSTERY SHAMPOO is safe for use on fabrics and carpets that are unaffected by water, including natural fibers (cotton, wool) or synthetic (nylon, olefin, polyester) fibers. However, test the diluted product in an inconspicuous area prior to use.

**DIRECTIONS**

1. Use commercial vacuum with beater bar or pile lifter before shampooing. Use a stiff brush prior to vacuuming in heavy traffic areas to loosen embedded soil. Remove gum and stains by pre-spotting.
2. CARPET & UPHOLSTERY SHAMPOO is a concentrate and must be diluted prior to use.
3. Dilute 1 part CARPET & UPHOLSTERY SHAMPOO with 16 parts warm water, which is equivalent to 8 ounces of shampoo per gallon of water.
- 4 For extremely soiled conditions the dilution can go up to a maximum of 1:10 or 13 ounces per gallon.
5. Do not overwet carpet.
6. CARPET & UPHOLSTERY SHAMPOO should be used with the proper technique and equipment so that maximum foam is generated and the cleaning is done by contact with stiff foam containing minimum liquid. Consult Cello for assistance in proper procedure. If extraction will follow shampooing allow solution to dwell 5 to 10 minutes prior to continuing restoration procedure.

**CAUTION:** Eye irritant. Avoid contact with eyes.

**FIRST AID:** In the event of eye contact, flush eyes with large amounts of clear water for at least 15 minutes. If irritation persists, seek medical attention.

**SPECIFICATIONS:**

**APPEARANCE:** Light straw liquid

**FRAGRANCE:** Very slight orange

**pH:** 8.0 ± 0.1

**DILUTION:** As recommended above

**COVERAGE:** 100 ft./gallon

**VISCOSITY:** Same as water

**FLASH POINT:** None

**FREEZE/THAW STABILITY:** Agitation required to reconstitute after freezing.

**SHELF LIFE:** Minimum 1 year from manufacturer date of sale

Contains no Phosphates
