

9 AQUA BLEND CONCENTRATED CARPET & UPHOLSTERY EXTRACTION CLEANER

B21

TECHNICAL DATA SHEET

GENERAL INFORMATION

CARPET & UPHOLSTERY EXTRACTION CLEANER is a concentrated blend of surfactants developed through years of carpet research to offer the most efficient system to clean "dirty" carpets.

It is engineered to rejuvenate carpet that once was considered unsalvageable. CARPET & UPHOLSTERY EXTRACTION CLEANER flushes out the deposits in the carpet left by previous cleaning, and restores the fibers to an almost "like new" condition, while leaving behind no tacky residue of its own to attract soil.

The ultimate cleansing system results when CARPET & UPHOLSTERY EXTRACTION CLEANER is used in conjunction with CARPET PRE-SPRAY & SPOTTER & CARPET & UPHOLSTERY SHAMPOO. This system will bring carpets back from the brink of having to be replaced. CARPET & UPHOLSTERY EXTRACTION CLEANER is safe for use on all fibers and fabrics unaffected by water which includes synthetic (nylon, rayon, polyolefin, orlon) and natural (cotton, wool) compositions. However, test the diluted product in an inconspicuous area prior to use.

DIRECTIONS

1. Use commercial vacuum with beater bar or pile lifter before shampooing. Use a stiff brush prior to vacuuming in heavy traffic areas to loosen embedded soil. Remove gum and stains by pre-spotting.
2. CARPET & UPHOLSTERY EXTRACTION CLEANER is a concentrate and must be diluted prior to use.
3. Dilute 1 part CARPET & UPHOLSTERY EXTRACTION CLEANER with 128 parts water (1 oz./gal.) in the extractor tank.
4. For extremely soiled conditions the dilution can go up to a maximum of 1:42 or 3 ounces per gallon.
5. Apply the CARPET & UPHOLSTERY EXTRACTION CLEANER solution to the carpet using minimum liquid necessary for acceptable cleaning. Then extract to remove liquid with one or more passes. Pile brush and allow to dry (pile brushing may not be necessary, depending on type of carpet and design – cut pile needs brushing, loop or multi-looped carpet does not). If excessive foam is encountered in the recovery tank, use Cello Defoamer at 1 oz. Per 5 gallons of tank capacity.

CAUTION: Eye irritant. Avoid contact with eyes.

FIRST AID: In the event of eye contact, flush eyes with large amounts of clear water for at least 15 minutes. If irritation persists, seek medical attention.

SPECIFICATIONS:

APPEARANCE: Dark Amber liquid

FRAGRANCE: Citrus

pH: 11.7 ± 0.2

DILUTION: As recommended above

COVERAGE: 100 ft./gallon

VISCOSITY: Same as water

FLASH POINT: None

FREEZE/THAW STABILITY: Agitation required to reconstitute after freezing.

SHELF LIFE: Minimum 1 year from manufacturer date of sale
