

CelloBrite®

CARPET CARE SYSTEM

CELLOBRITE® II SPIN BONNET CARPET CLEANER with DuPont® Protector for Soils & Stains

TECHNICAL DATA SHEET

GENERAL INFORMATION

CELLOBRITE II Spin Bonnet Carpet Cleaner utilizes the latest technology in carpet spin bonnet cleaning chemistry to provide deep cleaning while restoring carpet protection. CELLOBRITE II starts with a detergent cleaning system that does not leave a soil-attracting residue. This new detergent system is coupled with CelloBrite CARPET & UPHOLSTERY PROTECTOR to deliver a carpet cleaner that cleans and simultaneously adds protection from spills, stains and soil buildup.

CELLOBRITE II is most effective when used on carpet that has previously been treated with a mill-applied fluorochemical treatment such as DuPont® Duratech.

However, even carpet that has never been protected will receive protection after being cleaned with CELLOBRITE II due to the protector in the formula. This means that carpet cleaned with CELLOBRITE II will provide better soil resistance than new, untreated carpet. For maximum soil and stain resistance, use CelloBrite CARPET & UPHOLSTERY PROTECTOR after cleaning.

As recommended by major fiber producers and carpet manufacturer's, this cleaner does not contain optical brighteners.

DIRECTIONS

SHAKE BEFORE USING.

WARM TO AMBIENT ROOM TEMPERATURE PRIOR TO USE.

CELLOBRITE II Carpet Spin Bonnet Cleaner is a concentrate and must be diluted. Hot water is recommended.

RECOMMENDED DILUTIONS

For Previously Protected Carpets 12oz./gal. 1:10
For Unprotected Carpets 16oz./gal. 1:8

Prior to bonnet cleaning, carpet should be vacuumed thoroughly with a vacuum equipped with a carpet beater bar, or with a pile lifter.

Always test for colorfastness in an inconspicuous area prior to use.

Spray carpet directly using a pump up sprayer. Scrub carpet machine with carpet bonnet pad. When one side of pad becomes soiled, flip over and use second side. When both sides of the bonnet pad are soiled, change to a clean pad and repeat the process.

CELLOBRITE II may also be used with a mop bucket and wringer. Put diluted CELLOBRITE II solution in a mop bucket, then dip bonnet pad in solution and wring out thoroughly. Place bonnet pad under machine and scrub carpet until pad becomes soiled.

Turn pad over when first side becomes soiled. When second side becomes soiled, exchange with second bonnet pad while first pad is being soaked in mop bucket. Repeat process with second pad.

Note: Store product at room temperature. Do not freeze or subject to excessive heat.

Important: Do not leave residual CELLOBRITE II in pressure sprayer overnight. Flush out system with hot water immediately after completing cleaning operations.

CAUTION: Eye irritant. Avoid contact with eyes.

FIRST AID: In the event of eye contact, flush eyes with large amounts of clear water for at least 15 minutes. If irritation persists, seek medical attention.

SPECIFICATIONS

APPEARANCE: Light tan liquid

FRAGRANCE: Light solvent

pH: 6.25 ± 0.25

DILUTION: As recommended above

COVERAGE: 500 sq. ft./per gallon

KEEP FROM FREEZING.

VISCOSITY: Water thin

FLASH POINT: None

FREEZE/THAW STABILITY: Protect from freezing

SHELF LIFE: Minimum 1 year from manufacturer date of sale
