

CelloBrite®

CARPET CARE SYSTEM

CELLOBRITE® III CARPET EXTRACTION CLEANER

With Cellobrite™ Carpet & Upholstery Protector
(Contains DuPont® Protectors for Soils & Stains)

TECHNICAL DATA SHEET

GENERAL INFORMATION

CELLOBRITE III Carpet Extraction Cleaner utilizes the latest technology in carpet extraction cleaning chemistry to provide deep cleaning and simultaneously restore carpet protection. CELLOBRITE III starts with a detergent cleaning system that does not leave soil-attracting residue. This new detergent system is coupled with CelloBrite CARPET & UPHOLSTERY PROTECTOR to deliver a carpet cleaner that deep cleans and simultaneously adds protection from spills, stains and soil buildup.

CELLOBRITE III is most effective when used on carpet that has previously been treated with a mill-applied fluorochemical treatment such as DuPont® Duratech. However, even carpet that has never been protected will receive protection after being cleaned with CELLOBRITE III due to the protector in the formula. This means that carpet cleaned with CELLOBRITE III will provide better soil resistance than new, untreated carpet.

For maximum soil and stain resistance, use CelloBrite CARPET & UPHOLSTERY PROTECTOR after cleaning.

As recommended by major fiber producers and carpet manufacturer's, this cleaner does not contain optical brighteners.

DIRECTIONS

SHAKE BEFORE USING.

WARM TO AMBIENT ROOM TEMPERATURE PRIOR TO USE.

CELLOBRITE III is a concentrate and must be diluted. Hot water is recommended.

RECOMMENDED DILUTIONS

For Previously Protected Carpets 4oz./gal. 1:32
For Unprotected Carpets 6oz./gal. 1:21

Prior to extracting, carpet should be vacuumed thoroughly with a vacuum equipped with a carpet beater bar, or with a pile lifter. Pretreat spots and/or traffic lanes using CelloBrite CARPET RESTORATION PRE-SPRAY. Apply the CELLOBRITE III solution to the carpet using minimum liquid necessary for acceptable cleaning. After carpet extraction is complete, brush carpet pile all in the same direction. Allow carpet to dry thoroughly before opening to traffic. If excessive foam is encountered in the recovery tank, use CelloBrite DEFOAMER at 1 oz. per 5 gallons of tank capacity.

Note: Store product at room temperature. Do not freeze or subject to excessive heat.

Important: Do not leave residual CELLOBRITE III in extractor overnight. Flush out system with hot water immediately after completing cleaning operations.

CAUTION: Eye irritant. Avoid contact with eyes.

FIRST AID: In the event of eye contact, flush eyes with large amounts of clear water for at least 15 minutes. If irritation persists, seek medical attention.

SPECIFICATIONS

APPEARANCE: Tan liquid

FRAGRANCE: Sweet solvent

pH: 7.8 ±0.2

DILUTION: As recommended above

COVERAGE: 100 sq. ft. per gallon

VISCOSITY: Water thin

FLASH POINT: None

FREEZE/THAW STABILITY: Protect from freezing.

SHELF LIFE: Minimum 1 year from manufacturer date of sale

KEEP FROM FREEZING.
