

CelloBrite®

CARPET CARE SYSTEM

RINSEBRITE® LIQUID EXTRACTION CLEANER

TECHNICAL DATA SHEET

GENERAL INFORMATION

CelloBrite RINSEBRITE Liquid Extraction Cleaner utilizes unique carpet extraction surfactant chemistry to provide deep, complete cleaning, in order to restore carpet that is dingy or worn out in appearance. RINSEBRITE starts with a detergent cleaning system that does not leave a soil-attracting residue, coupled with new, special soil emulsifiers and environmentally safe solvents designed to completely emulsify and rinse out old soil and detergent residues.

RINSEBRITE in conjunction with CelloBrite CARPET RESTORATION PRE-SPRAY and CelloBrite DEEPDOWN Carpet & Upholstery Shampoo, helps restore carpet to "like new" condition. This is also the perfect system to thoroughly clean carpet in preparation for the application of CelloBrite CARPET & UPHOLSTERY PROTECTOR.

RINSEBRITE is safe for use on fabrics and carpet that are unaffected by water, including nylon, rayon, olefin, wool, and other synthetic and natural fibers. Always test for colorfastness in an inconspicuous area prior to use.

*As recommended by major fiber producers and carpet manufacturers, this cleaner does not contain optical brighteners.

DIRECTIONS

Use commercial vacuum or pile lifter before using RINSEBRITE.

RINSEBRITE is a concentrate and must be diluted prior to use. Best results are achieved when diluted with hot water.

RECOMMENDED DILUTIONS

<p>Light to Moderate Soil 2-3oz./gal. 1:64-1:42 Heavy Soil or Restoration 4oz./gal. 1:32</p>
--

Apply the RINSEBRITE solution to the carpet at the rate of 100 sq. ft. per gallon of diluted product. Use minimum liquid necessary for acceptable cleaning. Then extract to remove excess liquid with one or more passes. If excessive foam is encountered in the recovery tank, use CelloBrite DEFOAMER at 2 oz. per 5 gallons of tank capacity. After carpet extraction is complete, you may apply CelloBrite CARPET & UPHOLSTERY PROTECTOR according to directions.

CAUTION: Eye irritant. Avoid contact with eyes.

FIRST AID: In the event of eye contact, flush eyes with large amounts of clear water for at least 15 minutes. If irritation persists, seek medical attention.

SPECIFICATIONS

APPEARANCE: Clear amber liquid

FRAGRANCE: Citrus orange

pH: 9.8 ± 0.2

DILUTION: As recommended above

COVERAGE: 100 sq. ft. per gallon

VISCOSITY: Water thin

FLASH POINT: None

FREEZE/THAW STABILITY: Stable, minimum 3 cycles

SHELF LIFE: Minimum 1 year from date of sale

KEEP FROM FREEZING
