## CARPET CARE SYSTEM

### SPIN BRITE CARPET BONNET & EXTRACTION CLEANER WITH ENZYMES

## TECHNICAL DATA SHEET

#### GENERAL INFORMATION

Bonnet cleaning using CelloBrite SPIN BRITE Carpet Bonnet & Extraction Cleaner with Enzymes is an easy, economical method of interim carpet maintenance. Used on a regular basis, bonnet cleaning sharply reduces the need for the more labor-intensive rotary or extraction shampooing.

SPIN BRITE is uniquely formulated to leave no soil-attracting sticky detergent residues. SPIN BRITE may be applied using the bucket and wringer method or the pressurized sprayer method.

\*As recommended by major fiber producers and carpet manufacturers, this cleaner does not contain optical brighteners.

#### DIRECTIONS

Use commercial vacuum or pile lifter before using SPIN BRITE.

SPIN BRITE is a concentrate and must be diluted prior to use. Best results are achieved when diluted with hot water.

#### RECOMMENDED DILUTIONS

Pressure Sprayer 11oz./gal. 1:12  
Bucket & Wringer 12oz./gal. 1:10  
Extraction 2oz./gal. 1:64

#### Pressurized Sprayer Method:

1. Thoroughly spray the entire bonnet surface with the solution.
2. Spray the area to be cleaned; 6' x 4' sections at a time then buff.
3. When the bonnet becomes dirty, reverse it and spray the new surface.
4. When both sides of the bonnet become soiled, repeat the procedure with a clean or new bonnet.

#### Bucket & Wringer Method:

1. Soak carpet bonnet in solution. Wring out bonnet as dry as possible.
2. Place bonnet under a floor machine equipped with a pad holder.
3. Buff a 4'x4' section at a time, overlapping sections.
4. When one side of the bonnet becomes laden with soil, reverse bonnet and use the clean side.
5. Traffic may resume on carpet as soon as carpet is dry - usually in 30 minutes to one hour.
6. LARGE AREAS: It is advisable to use the double bucket method and extra bonnets. One bucket will contain the SPIN BRITE solution while the other will contain clear water. Soak a clean bonnet in the SPIN BRITE solution and follow directions as above. Meanwhile, soak a second bonnet in the solution for future use. When the first bonnet becomes soiled on both sides, soak it in the rinse bucket and wring it out well. Then remove the second bonnet from the solution bucket, wring it out, and proceed with the cleaning. Resoak the first bonnet in the solution bucket. Proceed in this manner. When both buckets become laden with soil, replace the solution bucket with fresh solution and replace the water in the rinse bucket.

#### Hot Water Extraction Method:

Apply SPIN BRITE solution to the carpet using minimum liquid necessary for acceptable cleaning. Allow to dry.

**CAUTION:** Eye irritant. Avoid contact with eyes.

**FIRST AID:** In the event of eye contact, flush eyes with large amounts of clear water for at least 15 minutes. If irritation persists, seek medical attention.

#### SPECIFICATIONS:

**APPEARANCE:** Milky liquid

**FRAGRANCE:** Mint odor

**pH:** 7.5 ± 0.3

**DILUTION:** As recommended above

**COVERAGE:** 500 sq. ft. per gallon

**VISCOSITY:** Water thin

**FLASH POINT:** >200°F

**FREEZE/THAW STABILITY:** Stable, minimum 3 cycles

**SHELF LIFE:** Minimum 1 year from manufacturer date of sale

KEEP FROM FREEZING
