CARPET CARE SYSTEM

BIO-BRITE®

**ENZYMATIC CARPET & UPHOLSTERY SPOTTER AND SHAMPOO
& EXTRACTION ADDITIVE**

TECHNICAL DATA SHEET

GENERAL INFORMATION

CelloBrite BIO-BRITE Enzyme Carpet & Upholstery Cleaner is an engineered blend of grease and soil releasing agents fortified with specific enzyme digesters yielding a broad spectrum of performance on synthetic and natural fibers.

BIO-BRITE is formulated to remove both inorganic and organic stains from carpet and upholstery fibers. It's broad spectrum enzymes are effective against stains resulting from spoiled food, feces, urine, vomit, and other human and animal releases. The powerful wetting agents in BIO-BRITE carry the enzymes to the "heart" of the stain where they chemically break down the usually hard-to-remove stains.

BIO-BRITE is not only effective against organically derived stains, but also against everyday stains resulting from grease, coffee, tea, wine, and inorganic clay-type soils.

*As recommended by major fiber producers and carpet manufacturers, this cleaner does not contain optical brighteners.

DIRECTIONS - FOR USE AS A SPOTTER:

Spray BIO-BRITE onto the soiled area. Work BIO-BRITE into the stain with the blunt end of a spotting brush. Use a clean white absorbent cloth to blot the stain. Exposing a new, clean area of the cloth, work or rub the spot from the outside edge toward the center. Repeat, exposing new areas of cloth while working around the outer edges and in toward the center. If the spot is of an organic nature and not removed completely by the preceding procedure, moisten the spot with BIO-BRITE and work into the spot. Cover with damp towel. Keep the area moist for at least one hour. Repeat if necessary, then rinse spot thoroughly with water and blot dry. Severe odors may require daily treatments until dissipated.

DIRECTIONS - FOR USE AS AN ADDITIVE/BOOSTER:

BIO-BRITE may also be added to extraction or rotary carpet cleaning equipment at a rate of 5 ounces per gallon to enhance cleaning and deodorizing. BIO-BRITE may be used anywhere that residual odor is a problem.

CAUTION: Eye irritant. Contains surfactants.

FIRST AID: EYES: Flush affected eye with large amounts of clear water while propping eyelid open. Continue for 15 minutes. If irritation persists, contact physician.

SPECIFICATIONS

APPEARANCE: Clear slight yellow

FRAGRANCE: Pleasant floral odor

pH: 7.5 ± 0.5

DILUTION: Ready-to-use

VISCOSITY: Water thin

FLASH POINT: None

FREEZE/THAW STABILITY: Stable, minimum 3 cycles

SHELF LIFE: Minimum 1 year from manufacturer date of sale

KEEP FROM FREEZING
