

TECHNICAL DATA SHEET

GENERAL INFORMATION

Cello NEUTRALIZER was developed to assist the floor care professional in the final step of preparing a stripped floor for the reapplication of a sealer or floor finish.

Using NEUTRALIZER in this critical final rinse step, helps to insure an excellent foundation with the first coat and the maximum performance of each additional coat of finish. This is especially true when stripping solution finds its way down into a more porous tile.

NEUTRALIZER can simply be added to the rinse water in a standard rinse bucket or added to the rinse water in an automatic scrubber. Also excellent for use on resilient and non-resilient flooring for removing hard water, detergent, uric acid (urine) deposits, and alkaline deposits left from most ice melters.

RECOMMENDED DILUTIONS

Damp Mop 2-4oz./gal. 1:64 - 1:32
Automatic Scrubber 2-4oz./gal. 1:64 - 1:32
Uric Acid Removal 8-10oz./gal. 1:16 - 1:12

DIRECTIONS

1. Completely strip off all old floor finish using a Cello floor stripper. Pick up solution. It is recommended that the floor be rinsed three times.
2. NEUTRALIZER may be added to any one of the rinse solutions, or all three if desired. Follow dilution instructions and rinse floor with mop or automatic scrubber
3. Allow to dry thoroughly. Floor is now ready for application of any Cello quality floor sealer or finish.

KEEP OUT OF REACH OF CHILDREN

CAUTION: May cause severe eye and skin irritation.

FIRST AID: Eyes: If in eyes, flush eyes with clear water while propping eyelids open. Continue for 15 minutes. If irritation persists, immediately get medical attention. SKIN: Flush affected area with water and wash with soap and water.

SPECIFICATIONS

APPEARANCE: Clear liquid

FRAGRANCE: Mint

pH: 2.0 ± .5

DILUTION: As recommended above

COVERAGE: 100 sq. ft. per gallon

VISCOSITY: Water thin

FLASH POINT: None

FREEZE/THAW STABILITY: Stable, minimum 3 cycles

SHELF LIFE: Minimum 1 year from manufacturer date of sale
