

AQUA SLEEK
WATER-BASED STAINLESS STEEL CLEANER

Z83

TECHNICAL DATA SHEET

GENERAL INFORMATION

AQUA SLEEK is an environmentally responsible product designed to clean and polish stainless steel, porcelain, chrome, bright metals, and ceramic tile.

AQUA SLEEK is a water based emulsion without the hazards associated with oil based products. It is pleasantly orange scented with no trace of solvent odors.

The cleaning properties of AQUA SLEEK surpass those of the oil based products, removing water borne as well as oil borne stains. Not recommended for use on cooking utensils.

DIRECTIONS

Spray surface until covered with a thin coating of AQUA SLEEK. Wipe with a damp cloth. For best results, buff with a dry, soft cloth.

On heavily soiled areas, apply a thin coating as above but allow AQUA SLEEK to stand for some time before wiping dry. Then lightly buff with a dry cloth to a high shine.

CAUTION: Contains petroleum distillates. Keep away from fire, open flames, and sparks. Do not spray into eyes or take internally.

FIRST AID: If eye contact is made, flush with copious amounts of water for at least 15 minutes. If irritation persists, get medical attention.

SPECIFICATIONS

APPEARANCE: White, milky emulsion

FRAGRANCE: Orange

DILUTION: Ready-to-use

FLASH POINT: 194°F

SHELF LIFE: Minimum 1 year from manufacturer date of sale

FREEZE/THAW STABILITY: Stable, minimum 3 cycles
